Affirmations for sleep

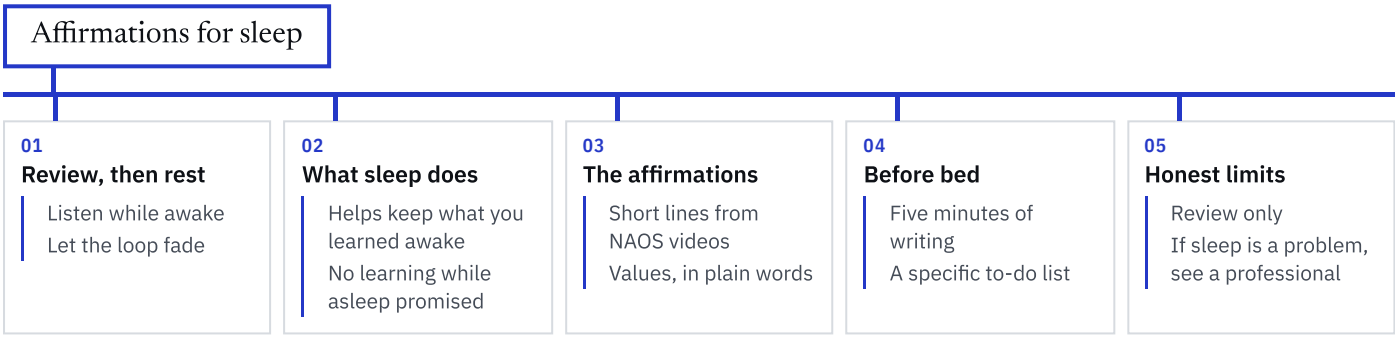

Looped affirmations rooted in peer-reviewed findings. A gentle review before sleep. The promise is review only; we do not claim you learn while asleep.

PLANNED

What you will learn

This piece is a quiet loop of short affirmations for the end of the day, drawn from findings you have met in NAOS videos. It is meant as a gentle review before sleep. We are careful about the promise: research shows sleep helps keep what you learned while awake, and in one study people did not consciously remember words they heard while falling asleep, so the value lies in the review you do while still awake. You will also find short notes on self-affirmation, and on a five-minute bedtime writing habit that helped people fall asleep faster.
