Exercise articles

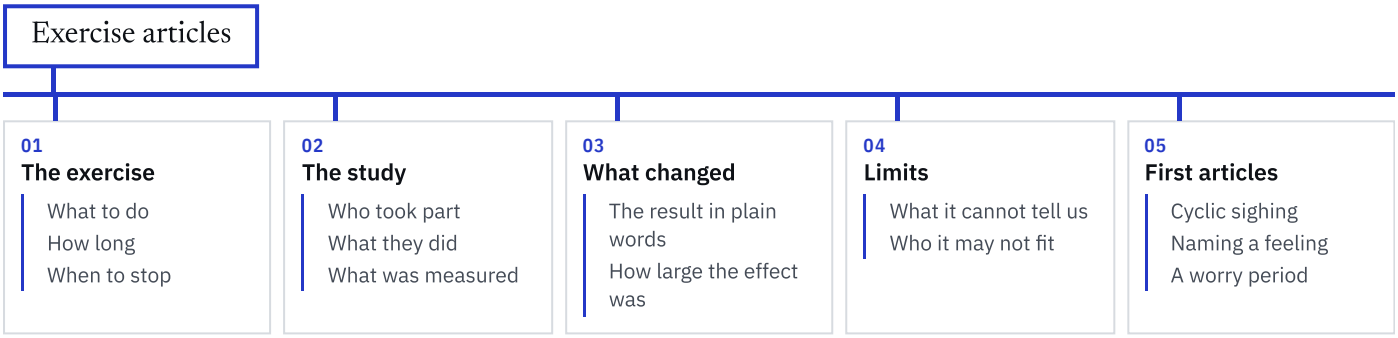

Each exercise with the peer-reviewed studies behind it. Drafted by NAOS, read and signed by N.

PLANNED

What you will learn

NAOS Shorts teach small exercises: a slower breath, naming a feeling, giving worry its own time. Each article takes one exercise and lays out the study behind it: who took part, what they did, what was measured, what changed, and what the study cannot tell us. NAOS drafts each article, and N reads and signs it. The aim is that you can judge the evidence yourself, try the exercise with realistic expectations, and know when a practice is not enough and it is time to talk to a professional.
